The *Belfield* Theme

University College Dublin

Enda Hargaden

Summer 2023

The **belfield** theme incorporates much of UCD's corporate branding

The theme highlights the official logo and uses images from the university website.

- The colour scheme corresponds to the University's official colours
- The footer is cropped from a university image
- The style file creates keywords for university branding, like UCDNavy
- The theme works well with pdflatex
- (I took some artistic licence here and there)

Attention-grabbing slide!

(You might recognise the background image from ucd.ie)

Mathematics obviously also work well in beamer

$$f(x) = ax^2 + bx + c$$

Mathematics obviously also work well in beamer

$$f(x) = ax^2 + bx + c$$

Mathematics obviously also work well in beamer

$$f(x) = ax^2 + bx + c$$

Mathematics obviously also work well in beamer

$$f(x) = ax^2 + bx + c$$

It is easy to create alert boxes

Theorem

$$h^2 = a^2 + b^2$$

Or, alternatively stated:

This is blocked text

The square of the hypotenuse h is equal to the sum of squares on the other two sides.
